

Web Programming using PHP: Basic to Intermediate

Web server: Apache 2

Server-side script: PHP 5

Database server: MySQL 5 Community Edition

Database administration: phpMyAdmin

Module Content: Web Application Development using PHP5 and MySQL 5

Chapter 01: PHP Introduction

- 3-tier Application Environment 1:1
- Intro to PHP 1:3
- Exercise 1 1:3
- The Development Tools 1:3
- Testing the First PHP Script 1:5

Chapter 02: PHP Syntax

- The PHP Script Tag 2:1
- Comments 2:1
- Statements 2:2
- Expressions 2:2
- Variables 2:3
- Reserved Words 2:3
- Literal Values 2:5
- Printing Messages 2:5
- Concatenation 2:6
- Simple Debugging Techniques 2:7
- Exercise 2 2:8

Chapter 03: Form Interactions

- Input Through HTML using GET Method 3:1
- Example 1 – Sending username and password. 3:2
- Example 2 – Sending personal information (with error) 3:5
- Input Through HTML using POST Method 3:7
- Example 3 – Sending email and password using POST 3:7
- Live HTTP Headers 3:9
- Differences between GET and POST method 3:10
- Extracting Form's Information using \$_GET 3:11
- Displaying Variable's Value using echo 3:12
- Exercise 3 3:13

Chapter 04: PHP Operators

- Assignment Operators 4:1
- Arithmetic Operators 4:2
- Examples for Arithmetic Operations 4:3
- Example 1: Add 2 numbers 4:3
- Example 2: Currency converter 4:5
- Example 3: Simple statistical application 4:7
- Exercise 4.1: Mathematical expressions 4:9
- Comparison Operators 4:10
- Logical Operators 4:10
- Other Operators 4:11
- Exercise 4.2: Boolean expressions 4:12

Chapter 05: Array

Chapter 06: Selection Structures

- Simple if 6:1

• if... else	6:2
• if... else if ... else if ...else	6:4
• Nested if...else	6:6
• Form Validation	6:8
• Example 1: Validating username and password	6:8
• Example 2: Validating numbers	6:10
• Example 3: Validating email address using regular expression	6:12
• Exercise 6	6:13

Chapter 07 :Repetition Structures

• Usage of Repetition	7:1
• for	7:1
• while	7:2
• do...while	7:5
• foreach	7:6
• Example 1: Generating date input in combo box	7:9
• Exercise 7	7:11

Chapter 08: Tools for Web Application Development

• The Database Server, MySQL Community Edition	8:1
• The Database Administrator, phpMyAdmin	8:2
• Tutorial 1: A brief introduction to phpMyAdmin main page	8:2
• Tutorial 2: Changing the MySQL root password in phpMyAdmin	8:3
• Tutorial 3: Importing an existing database in phpMyAdmin	8:6
• MySQL Improved Extension (mysqli_)	8:8

Chapter 09: Record Listing using SELECT

• Connecting to MySQL Databse Server and the Database using mysqli_connect	9:1
• Creating SQL query	9:3
• Execute the query	9:3
• Check the records effected	9:4
• Fetch a record and display	9:4
• Multiple records listing	9:6
• Populating the records inside a table	9:8

Chapter 10: Search Record using SELECT

• Simple Search	10:1
• Combine search form and result (in one page)	10:4
• Search by preferred criteria	10:6
• Search by combination of criteria	10:9

Chapter 11: Inserting a New Record using INSERT

• Simple Record Insertion	11:1
• Advanced Form for Insert Record Application	11:4

Chapter 12: DELETE an Existing Record

- DELETE command 12:1
- Delete and Existing Record 12:1
- Listing Records for Deletion 12:1
- Delete Confirmation Page 12:4
- Delete a Record Page 12:4

Chapter 13: UPDATE an Existing Record

- UPDATE command 13:1
- Simple Update Exercise 13:1
- Listing records to be updated 13:2
- Update form 13:4
- Update a record 13:6
- Advanced Update Exercise 13:7
- Improved Update Form 13:10
- Improved Save Update 13:12

Chapter 14: Logging in using Username and Password

- Creating the *adminusers* Table 14:1
- Simple Login Page 14:3
- Verification Process 14:4
- Menu Page for Administration 14:7

Chapter 15: Server-side Session

- So, what is Session? 15:1
- Starting Session 15:1
- Where is Session Information Stored 15:3
- Registering Session Variable 15:4
- Using the Session Variable 15:5
- Checking the Session Variable 15:5
- Destroying the Session 15:6

Chapter 16:Securing the System's Parameter using Session

- Why use Session? 16:1
 - Applying the Check Session in the Web Application 16:2
 - Logout 16:6
 - Screen shots 16:8
-
